
a
Spurious terms per equation
b
True terms missed per equation
c
Mean selection frequency of spurious terms
SNR = 49 dB
Terms per equation
Selection frequency
n
d
e
f
n = 5000
SNR (dB)
Bayesian−ARGOS
ARGOS
SINDy
Lorenz, SNR = 49 dB, 100 trials per ring
g
Bayesian-ARGOS
h
ARGOS
i
SINDy
true terms
spurious terms
bar height: selection frequency over 100 trials
