
a
n = 5000
Aizawa ẋ3, true support
Aizawa ẋ3, screened support
Rössler ẋ1, true support
Breusch-Pagan R2
SNR (dB)
b
n = 5000
residual variance ratio (deciles)
c
n = 5000
lag-1 residual autocorrelation ρ1
d
Aizawa ẋ3, true support, n = 5000
derivative estimation
truncation error
state smoothing
coefficient error
share of residual variance
e
Aizawa ẋ3, SNR = 60 dB
standardised residual
fitted value (posterior mean)
f
Aizawa ẋ3, SNR = ∞
